

NAS Software Inc.

is pleased to announce an innovative new Canadian software program for French language learning.

L'amour des temps

NAS Software Inc and Clarity are pleased to announce an innovative new Canadian software program for French language learning.

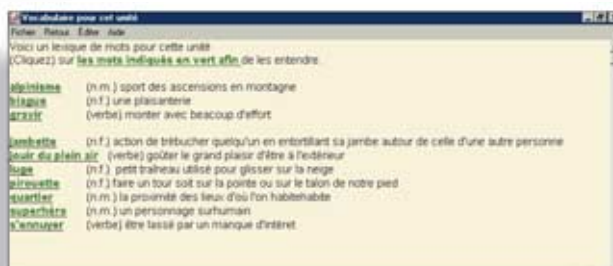

L'Amour des Temps is a unique new learning system that meets the needs of beginner to advanced level French students.

L'Amour des Temps unique interactive 'authoring' component allows teachers to customize the learning experience with new, up-to-date material, while retaining the basic learning elements of the original program.

L'Amour des Temps user – friendly environment makes the learning experience fun as students explore the many facets of the French language through their own interests and at their own pace. Students can do all this in a classroom setting or through independent study, which is enhanced by the extensive feedback that is an integral part of the program.

Students using *L'Amour des Temps* will become competent in reading, writing, listening and speaking the French language through a variety of hands-on, real-life exercises and experiences.

The popular *L'Amour des Temps* program helps students learn French quickly and effectively. The program consists of four comprehensive levels, each of which contains a 35-hour course organized systematically. Each level presents students with a basic introduction followed by a review of established concepts, the introduction of new material, grammar rules, and practice and testing exercises. All units come with integrated vocabulary work and learner training.

L'Amour des Temps features these exciting new tools for Student use:

FEEDBACK

Students can choose instant marking of their answers, or feedback at the end of an exercise. Reporting is extensive, designed to provide students with a complete understanding of the subject area.

SCRATCH PAD

This helps students define their learning objectives, to make notes, and develop learning strategies. It also enables free practice.

INTERACTIVE PROGRESS

This function presents students scores in visually exciting formats, allowing them to track progress over many different learning sessions.

SOUND

Students can listen to the pronunciation of new words and sentences in different accents.

L'Amour des Temps features this exciting, new innovative tool for Teachers:

AUTHORING

Teachers can adapt the *L'Amour des Temps* program to the precise needs of their students by adding sound, pictures, and videos as the need arises. This unique feature allows teachers to expand the French language teaching experience to other disciplines.

PRINTING EXERCISES

Teachers have the option to print one of the hundreds of exercises that the program offers or the lessons they have created using the authoring option. This option can save teachers many valuable hours of preparation time.

With a wide variety of interest material from around the world, thought-provoking activities, and a high interactive format, *L'Amour des Temps* will keep students absorbed for hours.

Minimum Requirements:
Pentium, Windows 95, CD and
Optional Sound Card.

* This program is fully networkable
